**MINISTRY OF PRIMARY AND SECONDARY EDUCATION**

# **INFORMATION COMMUNICATION TECHNOLOGY (ICT)**

## **JUNIOR (GRADE 3-7) SYLLABUS**

### **(2015 - 2022)**

**Curriculum Development and Technical Services,  
P.O. Box MP 133, Mount Pleasant, Harare**

All Rights Reserved  
Revised 2015

## ACKNOWLEDGEMENTS

The Ministry of Primary and Secondary Education wishes to acknowledge the following for their valid contribution in the production of the Information and Communication Technology (ICT):

- The National ICT Syllabus Panel:
  - Representatives from Universities, Technical and Teachers' Colleges
  - Zimbabwe Schools Examination Council (ZIMSEC)
  - Representatives of Book Publishers
- United Nations Children's Fund (UNICEF)
- United Nations Educational Scientific and Cultural Organization (UNESCO)

## 1.0 PREAMBLE

### 1.1 Introduction

The ICT syllabus is one of nine learning areas at Junior level as noted in the reviewed Curriculum Framework. It provides a broad perspective on the basic knowledge and practical skills on how to use and apply a variety of technologies in everyday life. The syllabus intends to equip learners with the general understanding of how information systems are designed to suit particular applications and how such systems work. The ICT syllabus is intended to be infused within other subjects in the school curriculum.

The syllabus will follow a developmental approach that will lead learners to grow into a mature relationship with ICT throughout the Junior education course.

### 1.2 Rationale

ICT requires learners to pay rigorous attention to developing adequate life and career skills. It adequately equips today's learners in entry-level work and beyond, in further study and lifelong learning, and in their personal lives as inquisitive, reflective, discerning and caring citizens. ICT is significantly enhancing and altering human activities, enabling us to live, work and think in ways that most of us never thought possible. Since technology has an increasingly significant impact, and such broad implications for every individual, groups and entire nation, learners must be prepared to understand, use and apply ICT in effective and efficient ways.

### 1.3 Summary of Content

The Junior School ICT syllabus covers theory and practical activities in areas such as drawing, programming and designing. This enables learners to be exposed to a wide variety of ICT tools and programmes which develop expertise, originality, confidence, self-identity (Unhu/Ubuntu/Vumunhu)

and ability to communicate. ICT provides unique opportunities for scaffolding and supporting learners with special learning needs, and learners from culturally or linguistically diverse backgrounds. The use of ICT encompasses enterprises skills, a significant contributor to the socio-economic transformation of the nation.

### 1.4 Assumptions

The syllabus assumes that learners:

- are able to manipulate some electronic tools at home
- have innate desire to explore the basic elements and principles of design
- have an appreciation of ICT tools
- are confident in dealing with complexities
- are able to communicate and work with others to achieve a common goal or solution.

### 1.5 Cross-Cutting Themes

ICT learning area will encompass and have a universal thrust on the following cross cutting themes:

- Financial Literacy
- Collaboration
- HIV and AIDS
- Heritage Studies
- Child Protection
- Gender
- Environmental Issues
- Disaster Risk Management

## 2.0 PRESENTATION OF THE SYLLABUS

The syllabus is presented as a single document catering for the junior level.

## 3.0 AIMS

The syllabus aims to enable learners to:

- 3.1 appreciate the role and impact of ICTs as they apply to self, work and society
- 3.2 develop an understanding of the operating skills required in a variety of technologies and acquire enterprise skills using ICTs
- 3.3 be creative and innovative in solving problems through ICTs
- 3.4 infuse ICTs in other learning areas across the curriculum apply moral and ethical approaches to the use of technology and create cultural heritage awareness, its preservation and development using ICTs.

4.4 manipulate data using ICTs

4.5 apply the elements and principles of design

4.6 present information in a variety of forms

4.7 archive cultural information using ICTs

4.8 infuse ICT into other learning areas

4.9 demonstrate the effectiveness of computer use, safety and security.

4.10 demonstrate enterprise skills

## 4.0 SYLLABUS OBJECTIVES

By the end of the course, learners should be able to:

- 4.1 identify ICT tools in the environment
- 4.2 create a computer based solution from a given problem statement
- 4.3 operate ICT tools to achieve specific tasks

## 5.0 TOPICS

5.1 ICT Tools

5.2 Creating and Publishing

5.3 Computer Software

5.4 Safety and Security

5.5 The World Wide Web and Online Collaboration

5.6 ICT Enterprise

5.7 Programming

5.8 Communication and Networks

## 6.0 SCOPE AND SEQUENCE

TOPIC	GRADE 3	GR 4	GR 5	GR 6	GR 7
<b>ICT TOOLS</b>	• Types of Computers	• Computer peripherals	• Fault diagnosis and fixing	• Hardware And Software Maintenance	• Faults in ICT Tools
<b>CREATING AND PUBLISHING</b>	• Charts • Bar Graphs • Pictograms • Images • Database Principles	• Presentations • Slide show of drawings • Databases	• Animation • Databases	• Database forms and reports	• Database queries
<b>COMPUTER SOFTWARE</b>	• Uses of software • Text Input • File management • Multimedia	• Desktop Publishing • File management • Multimedia	• Sending and receiving information (VoIP) • Multimedia	• Spreadsheets • Installation of software • Data storage • Multimedia	• Multimedia
<b>SAFETY AND SECURITY</b>	• Passwords	• Computer Viruses	• Cyber Wellness	• Hacking	• Firewalls • Antivirus • Data Legislation
<b>THE WORLD WIDE WEB AND ONLINE COLLABORATION</b>	• Web page • Search Engines • Information Presentation • e-Messages	• Web page • Search Tools • Search engines • Information Presentation • e-Messages	• Surfing the Internet • E-mail	• Web Page • Surfing the Internet • Mailbox • Web design	• Surfing the Internet • Web design
<b>ICT ENTERPRISE</b>	• Data capture clerk • Sound technician	• Computer Operator • Copyist	• Digital Photographer	• Web Developer	• ICT Careers • Web Designing • Software Technicians • Network Technicians

<b>TOPIC</b>	<b>GR3</b>	<b>GR4</b>	<b>GR5</b>	<b>GR6</b>	<b>GR7</b>
<b>PROGRAMMING</b>	• Sequence of Instructions	• Sequence of Instructions	• Programming Games	• Non-gaming	• Text based Programming
<b>COMMUNICATION AND NETWORKS</b>			<ul style="list-style-type: none"> <li>• Network Types</li> <li>• Network Connectivity</li> <li>• Network Topologies</li> <li>• Network Components</li> </ul>	<ul style="list-style-type: none"> <li>• Network Types</li> <li>• Network Connectivity</li> <li>• Network Topologies</li> <li>• Network Components</li> </ul>	<ul style="list-style-type: none"> <li>• Cable design</li> <li>• Network Setup</li> <li>• Peer to peer Connections</li> <li>• Mobile Networks</li> <li>• Internet Services</li> </ul>

## 7.0 Competency Matrix

### Grade 3

TOPIC	LEARNING OBJECTIVES Learners should be able to:	CONTENT/ COMPETENCIES	SUGGESTED ACTIVITIES AND NOTES	SUGGESTED RESOURCES
7.1 ICT TOOLS	<ul style="list-style-type: none"> <li>• identify different types of personal computers</li> <li>• distinguish different types of computers</li> <li>• use any type of computer</li> </ul>	<ul style="list-style-type: none"> <li>• Types of Computers           <ul style="list-style-type: none"> <li>- Desktop</li> <li>- Laptop</li> <li>- Palmtop such as Smart phone, Tablet</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Naming different types of computers</li> <li>• Matching computer pictures with their names</li> <li>• Describing different types of computers</li> <li>• Operating any type of computer</li> </ul>	<ul style="list-style-type: none"> <li>• Picture clips of computers, desktop, laptop, palmtops</li> </ul>
7.2 CREATING AND PUBLISHING	<ul style="list-style-type: none"> <li>• create graphs</li> <li>• amend created graphs</li> <li>• interpret any given graph</li> <li>• present information in different forms</li> </ul>	<ul style="list-style-type: none"> <li>• Charts           <ul style="list-style-type: none"> <li>- Bar Graphs</li> <li>- Pictograms</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Using a graphing package to create a graph</li> <li>• Adding labels and amending the charts</li> <li>• Deducing information from graphs</li> <li>• Showing the same information on different graphs</li> </ul>	<ul style="list-style-type: none"> <li>• Ms Excel, Computers, printed graphs</li> </ul>

TOPIC	LEARNING OBJECTIVES Learners should be able to:	CONTENT/ COMPETENCIES	SUGGESTED ACTIVITIES AND NOTES	SUGGESTED RESOURCES
7.3 COMPUTER SOFTWARE	<ul style="list-style-type: none"> <li>identify the ICT appliances that use software at home, school and workplace</li> <li>describe the functions of computer software at home, school and workplace</li> <li>create a word-processing document</li> <li>insert word art in a document</li> <li>edit document using word processing tools</li> <li>identify given storage devices</li> <li>insert a storage device</li> <li>Retrieve information from storage devices</li> <li>Combine text, images and sound record and store music, voice and video</li> <li>explore sound and music in ICT using keyboards, and onscreen music software</li> </ul>	<ul style="list-style-type: none"> <li>Uses of software <ul style="list-style-type: none"> <li>Software in the home</li> <li>Software in the school</li> <li>Software in the workplace</li> </ul> </li> <li>Text Input <ul style="list-style-type: none"> <li>Adding images</li> <li>Text boxes</li> <li>Word art</li> <li>Save and load their work</li> </ul> </li> <li>Formatting text <ul style="list-style-type: none"> <li>Font type</li> <li>Font size</li> <li>Font Colour</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Naming ICT appliances that use software at home, school and workplace</li> <li>Discussing the functions of computer software at home, school and workplace</li> <li>Typing text and inserting images to create a printable document <ul style="list-style-type: none"> <li>Designing a document with word art</li> <li>Changing text appearance</li> </ul> </li> <li>File management <ul style="list-style-type: none"> <li>Memory cards</li> <li>CD/DVDs</li> <li>Flash disk</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Intercom, computers, e-learning software, DSTV, remotes, life support systems</li> <li>Typing Tutor, MS Word, WordPad, computers, printers</li> <li>Memory cards, CDs, DVDs, Flash disks</li> <li>Computers, cameras, smartphones, drawings, picture clips, speakers, headsets, Moviemaker</li> </ul>

TOPIC	LEARNING OBJECTIVES Learners should be able to:	CONTENT/ COMPETENCIES	SUGGESTED ACTIVITIES AND NOTES	SUGGESTED RESOURCES
<b>7.4 SAFETY AND SECURITY</b>	<ul style="list-style-type: none"> <li>create a password</li> <li>modify a password</li> <li>delete a password</li> </ul>	<ul style="list-style-type: none"> <li>Password           <ul style="list-style-type: none"> <li>- relevance</li> <li>- creation</li> <li>- removal</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Creating passwords</li> <li>Changing existing passwords</li> <li>Removing a password</li> </ul>	<ul style="list-style-type: none"> <li>Smartphones, Files, ICT Tools</li> </ul>
<b>7.5 THE WORLD WIDE WEB AND COLLABORATION ONLINE</b>	<ul style="list-style-type: none"> <li>identify the components of a web page</li> <li>identify search engines</li> <li>use search tools and search engines to find information</li> </ul>	<ul style="list-style-type: none"> <li>Web page</li> <li>Search Engines</li> </ul>	<ul style="list-style-type: none"> <li>exploring components of a web page stating web addresses, menu buttons and links</li> <li>recognising search engines</li> <li>Entering given text into a search engine to find specific given web sites</li> </ul>	<ul style="list-style-type: none"> <li>Internet, printed web pages</li> <li>Computers</li> <li>Internet, search engine like google, yahoo, ask.com</li> <li>Computers</li> </ul>
<b>THE WORLD WIDE WEB AND COLLABORATION ONLINE <i>continued...</i></b>	<ul style="list-style-type: none"> <li>identify different forms of information (text, images, sound, multimodal)</li> <li>use information from the internet to answer specific questions</li> <li>formulate key questions and find information to answer them</li> </ul>	<ul style="list-style-type: none"> <li>Information Presentation</li> </ul>	<ul style="list-style-type: none"> <li>Recognising that information from the internet can either be in the form of text, images and sound.</li> <li>Using web based resources to find answers to questions</li> <li>Constructing questions about a specific topic and use information to answer those questions</li> <li>Navigating within a website using hyperlinks and menu buttons to locate information</li> </ul>	<ul style="list-style-type: none"> <li>Internet, search engine like Google, Yahoo, Ask.com</li> <li>Computers</li> </ul>
	<ul style="list-style-type: none"> <li>identify different ways that messages can be sent</li> <li>send messages electronically over distances</li> <li>reply to electronic messages</li> </ul>	<ul style="list-style-type: none"> <li>e-Messages</li> </ul>	<ul style="list-style-type: none"> <li>Discussing different ways that messages can be sent, (letters, telephone, email, text, instant messaging)</li> <li>transmitting electronic messages using smart phones</li> <li>Responding to electronic messages</li> </ul>	<ul style="list-style-type: none"> <li>Smart phones, instant messaging software such as WhatsApp, Skype, Twitter</li> </ul>

TOPIC	LEARNING OBJECTIVES Learners should be able to:	CONTENT/ COMPETENCIES	SUGGESTED ACTIVITIES AND NOTES	SUGGESTED RESOURCES
<b>7.6 ICT ENTERPRISE</b>	<ul style="list-style-type: none"> <li>• state the roles of a data capture clerk and a sound technician</li> <li>• operate a PA System</li> </ul>	<ul style="list-style-type: none"> <li>• Data capture clerk</li> <li>• Sound technician</li> </ul>	<ul style="list-style-type: none"> <li>• Listening to a presentation from a data capture clerk and sound technician</li> <li>• Demonstrating how a PA system works</li> </ul>	<ul style="list-style-type: none"> <li>• PA system</li> <li>• Resource person e.g. Data Capture Clerk, Sound technician</li> </ul>
<b>7.7 PROGRAMMING</b>		<ul style="list-style-type: none"> <li>• outline how a computer processes instructions and commands</li> <li>• demonstrate that devices are controlled by a sequence of instructions or actions</li> <li>• create sequence of instructions for a variety of programmable devices</li> <li>• edit a sequence of instructions for a variety of programmable devices</li> </ul>	<ul style="list-style-type: none"> <li>• Sequence of Instructions - Programming</li> </ul>	<ul style="list-style-type: none"> <li>• Turtle, logo, scratch</li> </ul>

**GRADE 4**

<b>TOPIC</b>	<b>LEARNING OBJECTIVES</b> Learners should be able to:	<b>CONTENT/ COMPETENCIES</b>	<b>SUGGESTED ACTIVITIES AND NOTES</b>	<b>SUGGESTED RESOURCES</b>
<b>7.8 ICT TOOLS</b>	<ul style="list-style-type: none"> <li>• identify input, output and storage devices</li> <li>• use appropriate computer peripheral devices</li> <li>• connect computer peripherals</li> </ul>	<ul style="list-style-type: none"> <li>• Computer Peripherals           <ul style="list-style-type: none"> <li>- Input Devices</li> <li>- Output Devices</li> <li>- Storage Devices</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Matching peripheral devices pictures to their names</li> <li>• Operating the computer peripherals</li> <li>• Connecting input and output devices</li> </ul>	mouse, keyboard, touch pad, digital camera, scanner, printers, monitors, speakers, projectors, flash disk, optical disks, external hard drives, memory card
<b>7.9 CREATING AND PUBLISHING</b>	<ul style="list-style-type: none"> <li>• create a presentation</li> <li>• import images into presentation</li> <li>• change slide layouts</li> <li>• add text descriptions to the slides</li> </ul> <ul style="list-style-type: none"> <li>• add data to an existing database</li> <li>• use the data in an existing database to generate graphs and charts</li> </ul>	<ul style="list-style-type: none"> <li>• Presentations</li> <li>• Slide Show with Drawings</li> </ul> <ul style="list-style-type: none"> <li>• Databases</li> <li>• Tables</li> </ul>	<ul style="list-style-type: none"> <li>• Designing presentation with drawings</li> <li>• Editing the layout of slides</li> <li>• Entering descriptive text on the slides</li> </ul> <ul style="list-style-type: none"> <li>• Capturing data into an existing database</li> <li>• Using database software to create graphs and charts</li> </ul>	<ul style="list-style-type: none"> <li>• Drawings, MS PowerPoint</li> <li>• Computers</li> </ul> <ul style="list-style-type: none"> <li>• MS Access</li> <li>• Computers</li> </ul>

## 8.0 ASSESSMENT

The syllabus' scheme of assessment is grounded on the principle of inclusivity. Arrangements, accommodations and modifications must be visible in both continuous and summative assessments to enable candidates with special needs to access assessment.

### 8.1 ASSESSMENT OBJECTIVES

#### 8.1.1 Knowledge and Understanding

Learners should be able to:

- identify ICT tools in the environment
- recognise information in a variety of forms
- communicate using ICT tools
- incorporate ICT into other subjects
- present information in a variety of forms
- archive cultural information using ICT
- recognize professionals in ICT

#### 8.1.2 Problem solving

Learners should be able to:

- create a computer project from a given problem statement
- give commands to control a device using ICT
- present information in a variety of forms
- design data flow diagrams

#### 8.1.3 Practical Skills

Learners should be able to:

- select and apply appropriate techniques and principles to develop presentations
- design and develop solutions to given problem
- create a computer project from a given problem statement
- diagnose faults and repair ICT tools
- updating and using anti – virus software

### 8.2 SCHEME OF ASSESSMENT

The ICT Syllabus embraces both continuous assessment and summative examinations.

#### Continuous Assessment (55%)

## Information and Communication Technology (ICT) Junior (Grade 3 - 7) Syllabus

Profiling, tests, and practical assignments are administered and collated from Infant through to Grade 7. Projects through research and designs start at Grade 5. All the marks contribute to the final mark.

### **Summative Assessment (45%)**

The summative assessment comprises two components as follows:

#### **Paper 1**

1 hour 30 minutes – (40 marks) 20%

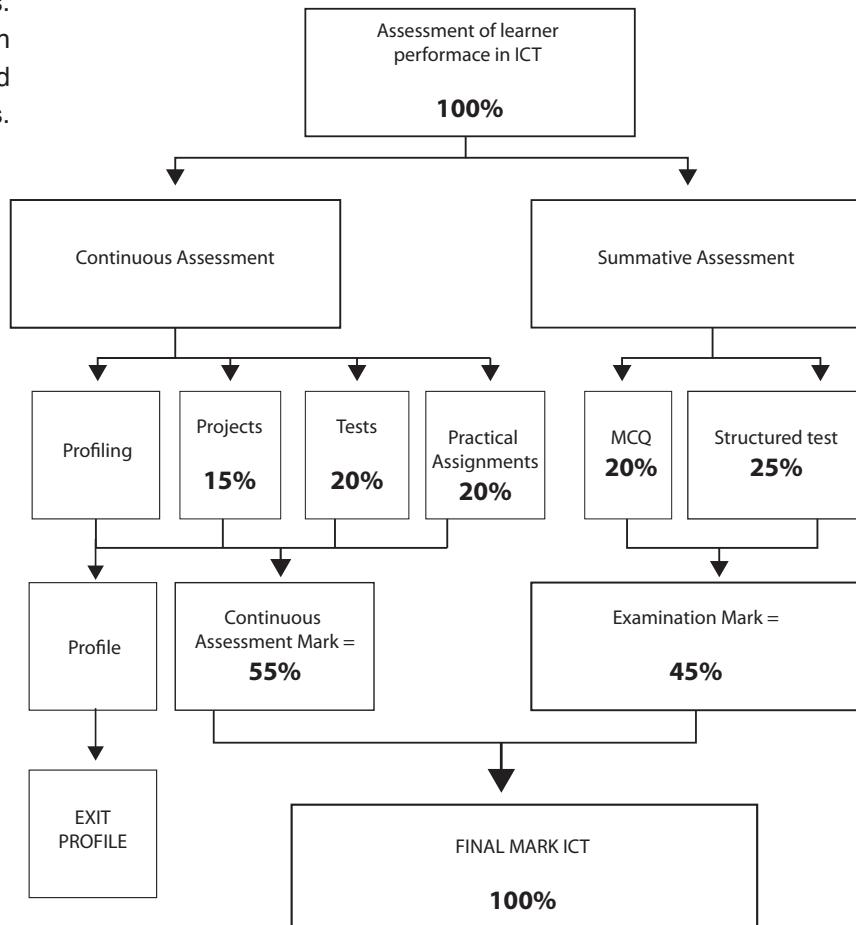

There are 40 multiple choice questions and candidates are required to answer all.

#### **Paper 2**

1 hour 30 minutes – (40 marks) 25%

Paper 2 comprises of Section A and B. Section A with approximately 25 questions is compulsory and carries 25 marks. Section B is a choice Section which carries 15 marks. A candidate is expected to choose 3 questions out of 5 questions. Each question carries 5 marks.

### **Model of Assessment**

---

Information and Communication Technology (ICT) Junior (Grade 3 - 7) Syllabus

---

There are three papers as shown in the table below.

PAPER	DESCRIPTION	DURATION	MARKS	WEIGHTING %
1	Multiple Choice Questions	1½ hours	40	20
2	Structured Questions	1½ hours	40	25
3	Continuous Assessment		100	55
<b>TOTAL</b>				<b>100</b>

### SKILLS WEIGHTING GRID

PAPER	KNOWLEDGE AND UNDERSTANDING (%)	APPLICATION (%)	PROBLEM SOLVING (%)	PRACTICAL SKILLS(%)	TOTAL
1	30	40	30	-	100
2	35	40	25	-	100
3	10	20	20	50	100

### 8.3 SPECIFICATION GRIDS

#### PAPER 1

	Topic	Weighting (%)
1	ICT tools	5
2	Creating and Publishing	10
3	Computer software	10
4	Safety and Security	5
5	The world wide web and collaboration online	10
6	Enterprise using ICT	10
7	Communication and networks	10
8	Programming	15
9	Application software	15
<b>TOTAL</b>		<b>100</b>

#### PAPER 2 STRUCTURED TEST

	Topic	Weighting (%)
1	ICT tools	5
2	Creating and Publishing	10
3	Computer software	10
4	Safety and Security	5
5	The world wide web and collaboration online	10
6	ICT Enterprise	10
7	Communication and networks	10
8	Programming	15
9	Application software	15
<b>TOTAL</b>		<b>100</b>

## PAPER 3 PRACTICAL ASSESSMENT

TOPIC	Weighting(%)
Application software	30
Creating and Publishing	40
Multimedia	10
World wide Web and Online Collaboration	10
Programming	10
<b>TOTAL</b>	<b>100</b>

## JUNIOR INFORMATION AND COMMUNICATION TECHNOLOGY PROFILE CHECKLIST

**Key: 5.**

**5. Excellent      4. Very Good      3. Good      2. Satisfactory      1. Needs Help**

<b>GRADE 3</b>							
<b>ICT TOOLS</b>							
Can identify different types of computers							
Can operate any type of computer							
<b>CREATING AND PUBLISHING</b>							
Can create a graph							
Can interpret a graph							
Can capture images							
Can transfer image from source to other devices							
Can add images and sound to a presentation							
Can classify data							
<b>COMPUTER SOFTWARE</b>							
Can interact with computer embedded systems							
Ability to create a word processing document							
Editing a word processing document							
Formatting a word processing document							
Saving a document							
Can identify different storage devices							
Can retrieve information from storage devices							
Combining text, images and sound to create multimedia presentations							
Can record audio							
Ability to compose music using musical software							

## Information and Communication Technology (ICT) Junior (Grade 3 - 7) Syllabus

<b>PROGRAMMING</b>							
Programming proficiency							
<b>GRADE 5</b>							
<b>ICT TOOLS</b>							
Identifying faults in ICT tools							
Resolving faults in ICT tools							
<b>CREATING AND PUBLISHING</b>							
Creating a database table							
Manipulating records in a table							
<b>COMPUTER SOFTWARE</b>							
Exchanging educational materials online							
Composing and recording music using musical software							
Producing multimedia presentations							
<b>SAFETY AND SECURITY</b>							
Showing Unhu/ Ubuntu/ Vumunhu when online							
<b>THE WORLD WIDE WEB AND ONLINE COLLABORATION</b>							
Searching educational information from the internet.							
Online collaboration with peers to produce work on a common subject							
Creating e-mail account							
Operating an e-mail account							
<b>ICT ENPTREPRISE</b>							
Identifying professionals in ICT							
<b>PROGRAMMING</b>							
Programming proficiency							
<b>COMMUNICATION AND NETWORKS</b>							
Ability to connect a device to a wired network							
Distinguishing network types							
Illustrate network topologies							
Setting up a peer to peer connection							
<b>GRADE 6</b>							
<b>ICT TOOLS</b>							
Ability to utilize utility software applications							
<b>CREATING AND PUBLISHING</b>							
Presenting forms and reports							
Arranging records using a set criteria							

## Information and Communication Technology (ICT) Junior (Grade 3 - 7) Syllabus

	1	2	3	4	5	DATES	COMMENTS
<b>COMPUTER SOFTWARE</b>							
Perform mathematical calculations on spreadsheet data							
Creating charts using spreadsheets data							
Sorting data							
Ability to install and uninstall software							
Saving and retrieving files to and from a cloud							
Creating 2D and 3D images							
Manipulating 2D and 3D images							
Recording educational video							
<b>SAFETY AND SECURITY</b>							
Demonstrating ways of curbing hacking.							
<b>THE WORLD WIDE WEB AND ONLINE COLLABORATION</b>							
Navigating a web page							
Designing a web page using a template							
Managing mailbox							
<b>ICT ENPTREPREISE</b>							
Identifying professionals in ICT							
<b>PROGRAMMING</b>							
Proficiency in creating non-gaming software							
<b>COMMUNICATION AND NETWORKS</b>							
Ability to connect to a wireless network							
Transferring files via wired and wireless networks							
Creating network topology models							
Sharing resources on a network							
<b>GRADE 7</b>							
<b>ICT TOOLS</b>							
Diagnosing and fixing faults in ICT tools							
Assembling and disassembling ICT tools							
<b>CREATING AND PUBLISHING</b>							
Creating queries using the design wizard							
Creating reports using the design wizard							
<b>COMPUTER SOFTWARE</b>							
Ability to alter images							
Cropping and editing images							
Creating and Editing video clips							
<b>SAFETY AND SECURITY</b>							
Installing and updating antivirus programs							
Configuring firewalls							
Awareness of data protection laws							
<b>THE WORLD WIDE WEB AND ONLINE COLLABORATION</b>							
Uploading text, images and videos to a website							

	1	2	3	4	5	DATES	COMMENTS
<b>ICT ENPTREPRESE</b>							
Outlining roles of ICT professionals							
<b>PROGRAMMING</b>							
Programming proficiency							
<b>COMMUNICATION AND NETWORKS</b>							
Produce and test a network cable							
Create a peer to peer network							
Ability to use mobile devices							
Interaction with internet services							

## 9.0 APPENDICES

### APPENDIX I: GLOSSARY OF TERMS USED IN QUESTION PAPERS

It is hoped that the glossary will be helpful to learners as a guide. The glossary has been deliberately kept brief not only with respect to the number of terms included but also to the descriptions of their meanings. Learners should appreciate that the meaning of a term must depend in part on its context.

- |                   |  |
|-------------------|--|
| 1. Define         | is intended literally, only a formal statement or equivalent paraphrases being required.   |
| 2. State          | implies a concise answer with little or no supporting argument e.g. numerical answer that can readily be obtained by inspection                                |
| 3. List           | requires a number of points generally each of one word with no elaboration, where a number of points is specified this should not be exceeded.                 |
| 4. Explain        | may imply reasoning or some reference to theory depending on the context   |
| 5. Describe       | requires the candidate to state in words (using diagrams where appropriate) the main points of the concept   |
| 6. Outline        | implies brevity that is restricting the answer to given essentials   |
| 7. Predict/deduce | the candidate is expected to produce the expected answer by making a logical connection between other pieces of information                                    |
| 8. Suggest        | it is used in two main contexts that is either to imply that there is no unique answer or to imply that learners are expected to apply their general knowledge |
| 9. Find           | is a general term that may variously be interpreted as calculate, measure, determine etc   |
| 10. Determine     | often implies that the quantity concerned cannot be measured directly but is obtained by calculation   |

### APPENDIX II: ACRONYMS

2D	2 Dimensional	Internet	International Network
3D	3 Dimensional	LAN	Local Area Network
2G	Second Generation	MAN	Metropolitan Area Network
3G	Third Generation	PA	Public Address System
4G	Fourth Generation	PAN	Personal Area Network
ATM	Automated Teller Machine	URL	Uniform Resource Locator
CDs	Compact Disks	VDU	Visual Display Unit
CCTV	Closed Circuit Television	VVoIP	Video and Voice over Internet Protocol
CPU	Central Processing Unit	WAN	Wide Area Network
DVDs	Digital Versatile Disks	WIMP	Windows Icons Menus Pointer
GUI	Graphical User Interface	WLAN	Wireless Local Area Network
ICT	Information and Communication Technology	WWW	World Wide Web
